

FINDING THE CARIBOU!

Take your students on an adventure that explores the real-world changes affecting the caribou in the Yukon.

This interactive experience for Grades 5 and 6 is curriculum-aligned, connecting science, social studies, and environmental stewardship in a hands-on, engaging way.

What's in store for your students?

Outdoor Tracking

Use ArcGIS mapping software to track caribou movements

Real-World Connections

Explore the impact of climate change on ecosystems

Take Action

Engage in a hands-on conservation project with a fun, solution-focused approach

GRADE LEVEL 5-6

EVERYTHING YOU NEED IS PROVIDED, INCLUDING:

- A short, online training session on how to facilitate the activity.
- A ready-to-use kit sent directly to your school with all necessary materials to bring the activity to life.
